MANIKANTHREDDY DAMMA

Data Analyst

Phone: +91-9640887178 | **Email**: manikanthreddydamma@gmail.com | **LinkedIn**: linkedin.com/in/manikanthreddy-damma
GitHub: github.com/manikanthreddy-1 | Hyderabad, India

Professional Summary

Data analyst with hands-on experience in data cleaning, SQL querying, ETL processes, and Power BI dashboard development, built through internship work and independent projects. Proficient in Python, SQL, Power BI, and Excel — applying exploratory data analysis, KPI development, and data visualization to turn raw data into business insight. Delivered dashboards and analyses that improved reporting turnaround and surfaced actionable customer and operational trends, with strong communication skills to translate technical findings for non-technical stakeholders. B.Com (Computer Applications) graduate applying analytical and business skills to real-world data challenges.

Technical Skills

- **Data Analytics & BI:** Power BI (DAX, Power Query, Data Modeling, Interactive Dashboards), Tableau, Business Intelligence Reporting, KPI Development, Dashboard Design, Data Visualization
- **Database & ETL:** SQL, MySQL, Data Extraction, Data Cleaning, Data Transformation, ETL
- **Programming:** Python, Pandas, NumPy, Matplotlib
- **Advanced Excel & Google Sheets :** Pivot Tables, XLOOKUP, VLOOKUP, Power Query, Conditional Formatting, Data Validation
- **Analytics:** Exploratory Data Analysis (EDA), Statistical Analysis, Data Wrangling
- **Tools:** Jupyter Notebook, VS Code, Git, GitHub
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Attention to Detail, Time Management

Experience

Data Analyst Internship **Sep 2025 - Feb 2026**
DIGIT Innovations ***Hyderabad, India***

- Cleaned and preprocessed 50,000+ rows of customer transaction data using Python (Pandas), reducing data errors by 30% and improving overall data quality.
- Performed Exploratory Data Analysis (EDA) to identify trends, outliers, and patterns, enabling data-driven decision-making.
- Wrote optimized SQL queries to extract KPIs from MySQL databases, automating 5 manual reporting tasks and saving hours of weekly effort.
- Designed interactive Power BI dashboards delivering weekly business insights, improving decision-making turnaround time by 20%.

Projects

1. Blinkit Data Analytics Project --- Sales, Delivery & Customer Insights across 8 Datasets | *Python, SQL, Excel, Power BI* | **(GitHub)**
[Mar 2026 - May 2026]

- Analyzed 8 relational datasets (50,000+ records) --- orders, products, customers, inventory, delivery, feedback, and marketing --- simulating a real-world quick-commerce business, using SQL to solve revenue, customer segmentation, and operational performance questions.
- Segmented customers by order frequency and average order value to uncover high-value vs. low-value groups, revealing key revenue-driving customer segments across 2,500+ customers.
- Evaluated delivery performance across 5,000 orders by comparing promised vs. actual delivery times, achieving a 69% on-time delivery rate and identifying traffic as the key bottleneck in delay-prone areas.
- Assessed marketing campaigns by tracking ROAS, impressions, clicks, and conversions across six campaign types (Flash Sale, Referral, Email, etc.), achieving an overall ROAS of 1.97 with the Referral Program performing highest at 2.03.

2. Customer Shopping Behavior Analysis | *Python, Excel, SQL, Power BI* | **(GitHub)**
[Nov 2025 - Dec 2025]

- Standardized 3,900 customer purchase records across 18 attributes, resolving missing values in 37 records (0.95%) through median imputation using Python and PostgreSQL .
- Segmented customer records using SQL subqueries and CASE statements, identifying 839 high-spending discount users (21.5%) whose purchase amounts exceeded the $59.76 mean.
- Built an interactive Power BI dashboard, identifying a 3.45% higher average transaction value for Express Shipping ($60.48) versus Standard Shipping ($58.46).
- Classified users into Loyal (80%), Returning (18%), and New (2%) tiers based on purchase history using SQL CASE statements.

Education

Satavahana University 2022 - 2025
Bachelor of Commerce (Computer Applications) *Karimnagar*

- **Relevant Coursework:** Business Statistics, Financial Accounting, Statistical Methods

Certifications

- **Data Analytics --- DIGIT Innovations (Feb 2026)**
- **SQL --- HackerRank (Sep 2025)**
- **Python --- HeroToZero (Aug 2024)**
